---

## INTRODUCING ICB

---

**ICB delivers sustainable environment friendly roofing solutions. Helping to pioneer the market for green and solar roofing, it is setting new standards in waterproofing, design, roof top technology and safety.**

ICB is the future of roofing and is supported by a nationwide network of fully trained and licensed installers. ICB Projects in its own right is an approved installer of Solar PV systems under the Microgeneration Certification Scheme (MCS).

The company has developed an enviable reputation for supplying and installing quality products, reliability and technical excellence – a market leader setting the pace for the rest of the roofing industry.

---

# SOLAR SOLUTION

---

**ICB is one of the fastest growing suppliers and installers of solar solutions for both flat and pitched roof applications. It works in partnership with specifiers, main contractors and building owners to realise the full potential from every solar installation.**

The company offers a wide range of specialist products, many of them unique and exclusive to ICB, and because it is a recognised MCS Installer, every customer qualifies for maximum benefits under the Government's Feed-in Tariff Scheme.

**“ICB is one of the fastest growing organisations of its kind.”**

---

# WATERPROOFING SOLUTIONS

---

**ICB supply and install one of the largest ranges of single ply membranes in the UK. This means it can offer the right solution for every type of roofing application where single ply is the preferred choice of waterproofing.**

Few can match ICB for choice, technical expertise, design support and its nationwide network of licensed contractors. It has succeeded by working closely with customers and key construction professionals to provide the right waterproofing solution – every time.

---

## SAFETY SOLUTIONS

---

**ICB works in partnership with one of the largest and most successful manufacturers of roof edge guard rails in Europe. It offers a bespoke package manufactured from lightweight recyclable aluminium.**

As with all systems in the ICB range, the company works closely with all customers to ensure that rooftop health and safety is a priority.

---

## ENGINEERED SOLUTIONS

---

**ICB produces a wide variety of engineered metal product solutions for the construction industry in its new Fabrication facilities, which incorporate a state of the art Colour Powder Coating plant.**

We can work from drawings or help you produce your design. We can produce everything from wall cappings, window cills, trims and flashings, to bespoke fascias and soffits, Brise soleil and other specialist products.

---

## GREEN SOLUTIONS

---

**ICB's green roof solutions offer more choice, more potential and more design capability than anything else currently available in the UK. The Diadem Green Roof systems are compatible with every type of waterproof membrane to ensure that a green roof from ICB is limited only by a designer's imagination.**

Supported by a nationwide network of licensed installers, any type or size of green roof is possible – intensive, extensive, brown, large or something more modest.

**ICB is proud to sponsor the RSPB campaign to save the sparrow.**

---

# TECHNICALLY SUPERIOR

---

ICB has been supplying quality products to the building industry for over 25 years. Our long-held reputation as an innovator continues today with the introduction of cutting edge Solar PV Panels. Today, ICB is one of the fastest growing organisations of its kind in the UK. We are the leading suppliers of sustainable, environmentally friendly roofing systems – all installed by licensed contractors to ensure that every project is completed to the highest possible standard, every time.

---

# CARBON ZERO

---

ICB has offset its entire carbon footprint to achieve the CarbonZero standard.

We teamed up with environmental experts to cut emissions throughout our business. Any remaining carbon is offset through global initiatives to reduce CO<sub>2</sub> and help developing countries become more energy efficient. We are also supporting forestation projects within the UK.
